

HP50HA

HEAT PUMP

Heat up your swimming pool experience.

The Hayward HP50HA Heat Pump lets you extend your swimming season. Open earlier in the spring, close later in the fall and swim each day well into the evening when your pool is heated with a HP50HA Heat Pump by Hayward.

HEATING

The HP50HA Heat Pump from Hayward® is the perfect addition to your swimming pool. It provides the perfect water temperature, extending your swimming pool season even in those cooler climates.

Model Number	BTU	C.O.P.	Platform	Voltage Hertz/Phase	Circuit Amps	Diameter Width x Depth	Height	Ship Wt. (lbs)	Unit Wt. (lbs)
HP50HA	50,000	5.4	Horizontal Fan	208-230 60/1	20	41 1/2" x 17 1/4"	25 1/2"	145	128

Features of the Hayward® HP50HA heat pump:

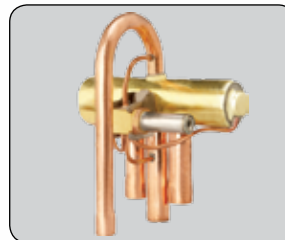

- 50,000 BTU heating capacity
- Uses less energy than a natural gas or propane heater
- Also includes a cooling mode to help lower water temperature
- High-efficiency titanium heat exchanger
- Extremely quiet operation
- Hot temperature defrost system to start in lower temperatures
- Electronic, programmable timer

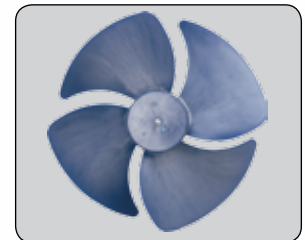

Titanium heat exchanger is highly durable and provides excellent resistance to corrosion.

Complete with a digital keyboard allowing all operation parameters to be set and displayed on the control panel.

A hot defrost gas valve enables the unit to operate at low ambient temperature.

Comprised of an efficient rotary compressor and a low noise fan which guarantees its quiet operation.
