

TWO EASY STEPS TO ORDERING RESIN POOL FENCING

STEP 1

Determine how much of your pool you want to fence. Fence is calculated by “**sections**” - the amount of fence used to cover a top rail on your pool, from pool support post to pool support post. Count the pool top rails you want to cover with fence - use this **number** for the next step.

STEP 2

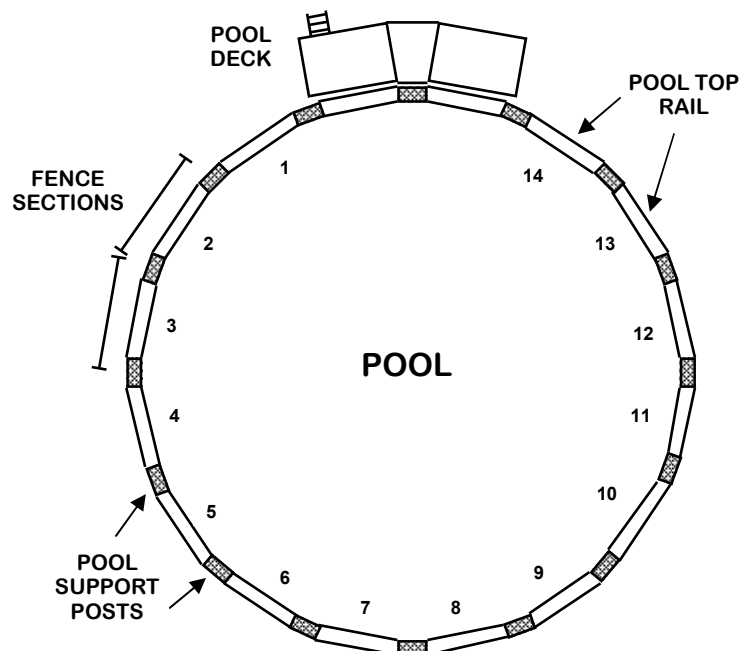

Choose the appropriate fence pack kits required. From Step 1, use the number of fence sections desired & refer to our “Breakdown Charts” to determine the fence pack kits required to order. Note: all fence pack kits include all hardware & instructions required for installation. (Packaging allows for 8 sections minimum)

BREAKDOWN CHARTS

# OF FENCE SECTIONS	FENCE PACK KITS REQUIRED TO ORDER	# OF FENCE SECTIONS	FENCE PACK KITS REQUIRED TO ORDER
8 OR LESS	1 A	16	1 A & 2 B & 1 C
9	1 A & 1 C	17	1 A & 3 B
10	1 A & 1 C	18	1 A & 2 B & 2 C
11	1 A & 1 B	19	1 A & 3 B & 1 C
12	1 A & 2 C	20	1 A & 4 B
13	1 A & 1 B & 1 C	21	1 A & 3 B & 2 C
14	1 A & 2 B	22	1 A & 4 B & 1 C
15	1 A & 1 B & 2 C	23	1 A & 5 B

EXAMPLE

This example illustrates a typical round pool with 16 pool top rails. The pool has a deck taking up two top rails of the pool, therefore, 14 sections of fence are required to completely enclose & protect the remainder of the pool. From the charts above, 14 sections = 1 A & 2 B fence pack kits - order appropriately.

MAKE YOUR POOL SAFE & ATTRACTIVE
